

Hi ,

It's been awhile since we discussed GPS tracking for your company. Here are some updates I thought you might find interesting. Most notably is the release of our newest tracker for 2011. See picture below with size dimensions. It's packed with new features and performing wonderfully. Also, pricing has improved markedly, making GPS tracking affordable for practically anyone.

- ☑ **3 Years Airtime** included - 1,500 pooled look-ups per device. (Never run low.) Free daily auto locates included.
- ☑ **3 Year Warranty** with immediate replacement. (Yes, devices are that reliable!)

Mobile Phone Location Icon! - We know you can't always be at your office computer. That's why we're excited about our new smart phone location icon. You are able to easily look up cars while on the go. Also, your installer will be able to field test devices on the spot. What's more, your repo person can track designated vehicles while en route.

For more information or a brief online demo, just give us a call. We look forward to talking with you soon.

Regards,
